

# Documentation of Non-CIC Crane Operator Certifications

CIC accepts other certifications nationally accredited by the National Commission for Certifying Agencies (NCCA) or the American National Standards Institute (ANSI). To have Non-CIC Certification(s) accepted, the certified operator must submit this form and pass the corresponding CIC Written Exams. The non-CIC certification(s) may not have expired before the operator's first CIC Written Exam.

**Attach a clear, readable copy of the front and back of your current certification card(s).**

At least 1,000 hours of safe operation as the designated operator must be documented on the **Hours Verification Form** and submitted with this form. An operator who cannot document at least 1,000 hours over the last five years will be required to take applicable Practical Exam(s).

CIC Registration
